## FOREWORD

This Directory of Small Scale Industrial Units is the first of its kind in West Bengal as it contains valuable information of all the Small Scale Industrial Units registered up to 31st March 1966 with the Directorate of Cottage and Small Scale Industries. The previous issues of the Directory were neither priced publications nor contained so much detailed statistics of individual Units. Another very important point to be noticed in the Directory is that it contains a detailed classified index of the varieties of the products produced by the Small Scale Industries in the various fields.

In order to achieve rapid industrial growth close collaboration between the large and small sector is essential. This Directory will indicate the probable fields of co-operation between these two sectors. This will also serve as a guide-book to other prospective entrepreneurs for starting new ventures.

Every effort has been made to give particulars of the units as correctly as possible but in such a voluminous compilation there may be some errors which, if brought to our notice, will be rectified in the subsequent issues.

## INTRODUCTION

This revised Directory shows the detailed information on the items of manufacture, installed capacity, employment, capital investment, etc., in respect of 9,009 Small Scale Industrial Units registered with the Directorate of Cottage and Small Scale Industries till 31st March 1966 from the very inception of the registration programme in West Bengal. The information contained in the earlier issues (volumes I to IV) have also been revised and brought up to date in the present Directory excluding the particulars of some Units whose registrations were cancelled due to various reasons.

The units are arranged District-cum-Industry-wise in alphabetical order. The industries are grouped according to the "International Standard Industrial Classification" the details of which are incorporated in the present volume. For units engaged in more than one type of industry, their names have been shown at one place giving the description of all the items manufactured by them. A glance at the Index for Industrial Products will help in finding out the different units engaged in the manufacture of specific items. This index will be of special importance to the users of the Directory looking for the manufacturers of particular product.

The pattern of the District-cum-Industry-wise distribution of all those 9,009 units is shown in a tabulated manner. It may be noticed from the District-wise analysis that most of the units are located in or around Calcutta. Nearly half of the Units, i.e., 49.05 per cent. are located within Calcutta. Howrah claims the second place with 19.18 per cent. while 24-Parganas ranks third with 13.83 per cent. of the total units. The rest of the units are distributed in other 13 Districts.

Analysing the units classified in different industry groups it is found that the group 'Basic metal industries' comes out to be the largest industry group with 19.75 per cent. of the total Units. Next largest industry group is the 'Manufacture of metal products' with 17.68 per cent. of the Units. The other major industry groups are Machinery except Electrical Machinery (10.54 per cent), Chemical and Chemical products (9.14 per cent), Textile including Textile wearing apparels (5.64 per cent.), Manufacture of electrical machinery and apparatus (5.43 per cent).

Since the Directory has been prepared in a great hurry, it is likely that there might be some errors and omissions. All users are, therefore, requested to kindly draw the attention of this office to any such mistakes so that those may be rectified in the subsequent issues.

Any suggestion to improve the Directory will be most welcome.
